

VITREON STEEL

LAUFEN

NEW FORM OF DIALOGUE

With VITREON Steel, LAUFEN presents a revolutionary material that opens up exciting new possibilities for bathroom architecture. A complement to LAUFEN's innovative material world, inspiring you to reimagine the bathroom in new forms, colours and material combinations. At the same time, VITREON Steel stands out for its outstanding functionality and exceptional durability. A discovery – in more ways than one.

VITREON Steel is glazed steel. An inseparable bond that, offers distinct advantages. The material combines the hygienic properties and colour intensity of glass with the robustness of steel. The special, pore-free surface created through the unique firing process repels micro-organisms, dirt and dust. VITREON Steel remains hygienic, corrosion-resistant, scratch-resistant and colour-fast.

With its VITREON Steel collections, LAUFEN introduces rich, deeper tones, metallic warmth and new architectural forms that only become possible through glazed steel and its unique properties. Particularly striking are the precise edges and clean geometries. The exclusive washbasins and vanity units in VITREON Steel integrate harmoniously into the overall bathroom. A coherent, architectural rhythm.

VITREON STEEL AT A GLANCE

Combines the colour-intensive and hygienic surface of glass with the robustness of steel.

Offers rich, deeper tones and metallic warmth.

Enables new architectural forms, such as particularly precise edges and clean geometries.

Integrates harmoniously into the overall bathroom, creating an architectural rhythm.

Features a pore-free surface that repels micro-organisms, dirt and dust.

Remains hygienic, corrosion-resistant, scratch-resistant and colour-fast.

Perfectly complements the innovative material world of LAUFEN.
