# VITREON STEEL

Smooth as glass and strong as steel – VITREON steel makes an impressive addition to the LAUFEN range of materials.

This highly innovative material combines the hygienic and colour-rich surface of glass with the robustness of steel. A material that enables non-porous surfaces, precise edges and clean geometries.

For a contemporary aesthetic and a new level of functionality and durability. Sophisticated bathroom design is enhanced by rich, darker tones, metallic warmth and new architectural forms, made possible only by glazed steel and its properties.

VITREON steel inspires and broadens the design perspective.
